

Street Vendor - Supporting Financial Profile

Demo Applicant ID	DEMO-VENDOR-001
Observation Period	January-June 2026
Income Source	Self-employed street-side retail activity
Income-source tenure	4 years

Income Evidence

Income is generated through frequent customer sales, cash deposits and UPI receipts. Monthly receipts vary materially across the demonstration period.

Recurring Financial Obligations

Recurring outflows include inventory purchases, stall-related costs, household expenditure, transport and utilities.

Payment and Transaction Behavior

The synthetic record shows irregular business receipts and changing inventory requirements. Obligations continue to be serviced, although the monthly buffer varies.

Cash-Flow Observation

Cash flow remains positive in the constructed six-month profile, but the margin between income and expenses is narrower and less predictable than in the salaried examples.

Transparency Note

Variable income does not itself imply inability to repay. The profile is designed to demonstrate how alternative transaction evidence can add context to a traditional credit model.

Responsible-use notice: This synthetic document is created solely for prototype demonstration. It does not contain a lending recommendation, approval/denial decision, or independently calculated credit-risk score.
